

Augmentum Fintech plc (the Company)

ALTERNATIVE INVESTMENT FUND MANAGERS REGULATIONS DISCLOSURES In respect of the Company's financial year ended 31 March 2022

The Company's AIFM, Frostrow Capital LLP and the Company are required to make certain disclosures available to investors in accordance with the Alternative Investment Fund Managers Regulations.

Those disclosures that are required to be made pre-investment are included within an Investor Disclosure Document which can be found on the Company's website www.augmentum.vc. During the year the Investor Disclosure Document was updated for the investment policy changes approved by shareholders on 8 July 2021 and to reflect changes to the manner in which performance fees payable to the Portfolio Manager are allocated within the Portfolio Manager.

The periodic disclosures to investors are made below:

- Information on the investment strategy, sector investment focus and principal stock exposures are included in the Strategic Report within the Company's Annual Report for the year ended 31st March 2022.
- None of the Company's assets are subject to special arrangements arising from their illiquid nature.
- There are no new arrangements for managing the liquidity of the Company or any material changes to the liquidity management systems and procedures employed by Frostrow.
- The Strategic Report and Note 13 to the Financial Statements in the Company's Annual Report for the year ended 31st March 2022 set out the risk profile and risk management systems in place. There have been no changes to the risk management systems in place during the year and no breaches of the risk limits set, with no breach expected.
- The maximum level of leverage did not change in the year under review. During the year ended 31 March 2022, the maximum permitted levels were 200% on a gross basis and 225% on a commitment basis. The Company had no leverage in place at the year end.
- No right of re-use of collateral or any guarantee were granted during the year.
- Following completion of an assessment of the application of the proportionality principle to the FCA's AIFM Remuneration Code, the AIFM has disapplied the pay-out process rules with respect to it and any of its delegates. This is because the AIFM considers that it carries out non-complex activities and is operating on a small scale

¹ **Alternative Investment Fund Managers Regulations ("UK AIFMD")**

Agreed by the European Parliament and the Council of the European Union and transposed into UK legislation, the UK AIFMD classifies certain investment vehicles, including investment companies, as **Alternative Investment Funds ("AIFs")** and requires them to appoint an **Alternative Investment Fund Manager ("AIFM")** and depositary to manage and oversee the operations of the investment vehicle. The Board of the Company retains responsibility for strategy, operations and compliance and the Directors retain a fiduciary duty to shareholders.

² **Leverage**

For the purposes of the UK AIFMD, leverage is any method which increases the Company's exposure, including the borrowing of cash and the use of derivatives. It is expressed as a ratio between the Company's exposure and its net asset value and can be calculated using **gross** and **commitment** methods. Under the gross method, exposure represents the sum of the Company's positions after the deduction of sterling cash balances, without taking into account any hedging and netting arrangements. Under the commitment method, exposure is calculated without the deduction of sterling cash balances and after certain hedging and netting positions (as detailed in the UK AIFMD) are offset against each other.
